

Bigham Vertical Fold Tool Bars give you an economical way to reduce your transport width with legendary Bigham quality.

Available in double 7x7" bars to triple and quad bars with combinations of 4x7" and 4x4" tubes, these tool bars give you the flexibility to outfit wide tools you can safely transport.

Standard Features:

- **4 x 48" Hydraulic cylinder provides capacity to lift any wing load with reduced operating pressure.** Wings fold up and cylinder locks into closed position for positive transport.
- **Diamond mast design is enhanced by one-piece stringer plates** (braces) cut from solid 5/8" plate. This design also centers cylinder and lifting lug between the bars of the wing. All tool bars are welded using pulse arc technology to minimize cracks near welds.
- **Heavy duty in-line hinge** incorporates 14 hinge ears per side on the double bar frame. (21 per side on triple bar frames.) Ears are cut from 1" plate. Hinge pins are a full 1-7/16" in diameter.
- **Heavy duty hinge with 2" hinge pin** sets hinge above the tool bar and allows a degree of fold over center.

Vertical Fold Tool Bars

Heavy Duty Hinge with 2" hinge pin.

Vertical Tool Bar with Heavy Duty Hinge 2 Inch Hinge Pin Mounted Above Bar

Unique Eyebolt Adjusting Kit allows up float, down float, or both.

4x48" Cylinder lifts the heaviest loads.

Five Section Double-Fold Tool Bar. Narrow Center Section and Flat Fold Wings for Reduced Transport Width and Height.

Vertical Tool Bar with In-Line Heavy Duty Hinge

Triple 4x4" Bar with Heavy Duty Option.

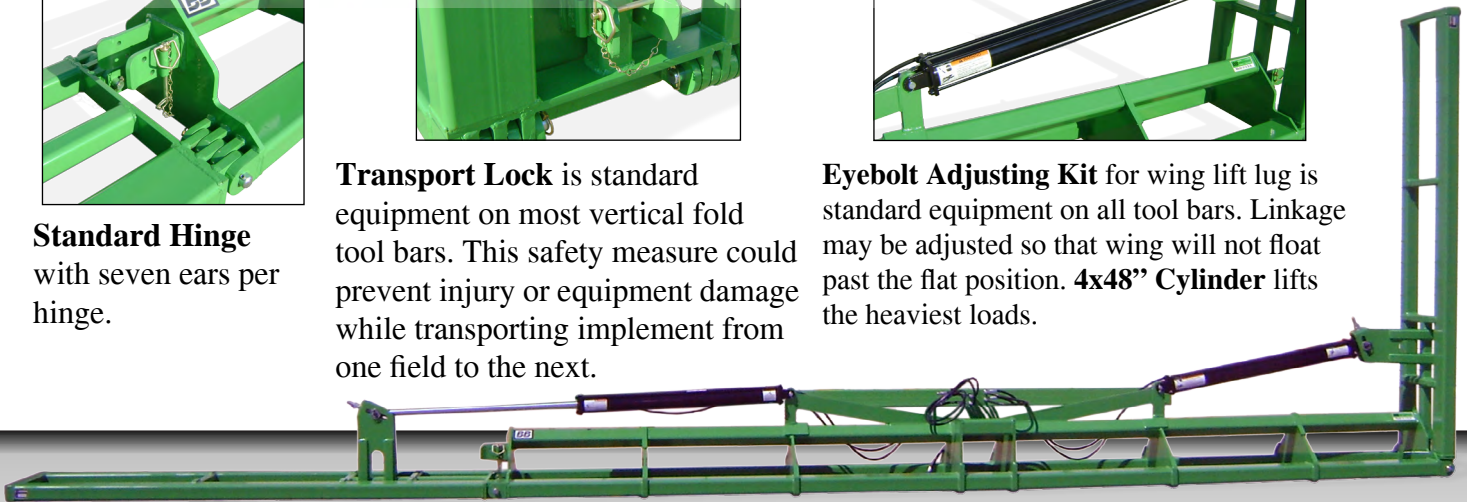

Standard Hinge with seven ears per hinge.

Transport Lock is standard equipment on most vertical fold tool bars. This safety measure could prevent injury or equipment damage while transporting implement from one field to the next.

Eyebolt Adjusting Kit for wing lift lug is standard equipment on all tool bars. Linkage may be adjusted so that wing will not float past the flat position. **4x48" Cylinder** lifts the heaviest loads.

Bigham offers a wide selection of tool bars. Please call for custom order information.
