# **ROD WEEDERS**

Remove weeds and condition seedbeds for excellent planting results with Bigham Brothers' wide selection of Rod Weeders. High carbon 1" square rod counter rotates under the seedbed to perform three jobs to enhance planter performance and seed emergence in row crops. Rod drive units may be selected to complement tractor equipment and a wide variety of rod placement hangers may be chosen to place rod accurately on any tool bar make-up. Rod weeder rod executes three important functions to prepare a seedbed:

1. Counter-rotation of rod uproots weeds and provide a positive mechanical undercut across the bed.

2. Rod weeder

attachment may be adjusted to operate rod at anticipated planting depth. Rod seals moisture at operating depth so that seed may be placed in fresh, moist soil.

> 3. Upper soil profile is agitated for surface drying. Dry soil on top acts as an abrasive to keep planter disc openers clean and prevent baking.

The Hydraulic End Drive Rod Weeder eliminates common headaches associated with conventional PTO driven Rod Weeders. Hydraulic End Drive Kits are used as complete attachments or as Changeover Kits for PTO driven rod weeders. (Bigham 6 or 12" offset, Hamby, **Standard Features:** or Roll-A-Cone)

#### **Complete End Drive Rod Weeder Attachments**

P/N	Description	Bearing H Type	langers Qty.	Rod Length	Approx. Ship Wt.
811-609	6 Row	6" O.S.	7	20'8''	265 Lbs.
811-615	6 Row	12" O.S.	7	20'8''	270 Lbs.
811-809	8 Row	6" O.S.	9	27'6''	330 Lbs.
811-815	8 Row	12" O.S.	9	27'6''	335 Lbs.

End Drive Rod Weeder Attachments Include: Hydraulic motor and mount hardware for 2 x 4" tool bar end cap, Drive connector with U-Joint, bearing hangers as noted, 1" Square rods with couplers as required (for 40" rows) and three 1" square set collars. Hoses are not *included.* Tool bar, shanks and clamps are pictured but not included. Please specify and substitute rods if for other than 40" rows.

• Dependable motor is mounted to provide adjustment for virtually any application. Lower torque of motor will prevent damage if rod is in a bind or locks down.

· Drive connector with dry-cap U-Joint assures a simple, reliable drive transfer that is easy to replace.

• Triple sealed permanently lubricated ball bearings are supplied in a wide selection of bearing hangers.

• High-Carbon 1" square steel rod for long life in abrasive soil.

Hydraulic Changeover Kits

## **ROD WEEDERS** (H.C. Lister, Direct Drive Kit)

Remove weeds and condition seedbeds behind your High Clearance Lister with the Bigham Brothers Hydraulic Center Drive Rod Weeder specifically designed for the high clearance lister beam. This attachment will knock the top of the bed down, seal moisture at a consistent depth and condition the very top of the bed to act as an abrasive when you follow with a planter equipped with double disc openers.

#### **Standard Features:**

#### **Rod Weeder Attachments for High Clearance Listers**

	В	earing Han	ger Overall	Approx.
P/N	Description	Qty.	Rod Length	Ship Wt.
811-845	4 Row	4	22'	230 Lbs.
811-847	6 Row	6	22'	300 Lbs.
811-849	8 Row	8	28'8''	375 Lbs.
811-851	10 Row	10	34'	425 Lbs.

Rod Weeder Attachments for High Clearance Listers Include: Hydraulic motor and boot assembly, mount bracket for center boot assembly, bearing hangers as noted and rods as required. **Kits include all bolts and hardware required to attach to existing High Clearance Lister. Hoses are not included.** Please specify and substitute rods for other than 40" rows.

The New Direct Drive Rod Weeder has been designed with simplicity as the primary objective. Direct connection from the motor to the rod is an effective way to reduce moving parts to improve service in the field. The motor mounting assembly has been designed for our Danfoss narrow profile compact motor. The narrow drive may be mounted in the bottom of the furrow without knocking down beds. Universal mount allows drive motor to be attached to the left or right side of the tool bar. Additional double lip seal in the mounting protects motor shaft input. Standard kit is compatible with Bigham Brothers 6" offset, Hamby and Roll-A-Cone rod weeders.

Direct Drive Rod Weeder Attachments Include: Hydraulic motor and mount hardware for 1x3" shank, drive coupler, bearing hangers as noted, 1" Square rods with couplers as required (for 40" rows) and three 1" square set collars. **Hoses are not included**. Please specify and substitute rods for other than 40" rows.

## **ROD WEEDERS** (Center Boot Drive; Folding Rod Weeders)

Rod Weeders have long been the tools which have set the standards of excellence in preparing seedbeds for row crops. The Bigham Brothers Center Boot Drive Rod Weeder is designed to do a precision job and built to last. The hex shaft boot design introduced in 1984 has proven to be superior in the field. This durable chain assembly is complemented by fully adjustable mount hardware and bearing hangers to be adaptable as an attachment to most any pre-plant or planting implement.

Standard Features:

- Choice of Hydraulic Boot Drive or PTO (1000 or 540 RPM).
- Boot design incorporates 60H chain tension adjustment. Gaskets and O-rings seal the boot to hold lubricating oil.
- Triple sealed permanently lubricated ball bearings.
- Hydraulic boot drive provides mounting flexibility. Boot may be placed in tractor tire middle or any other middle for special applications. Hydraulic motor will most likely discontinue rotation in the event of bearing failure or collision.
- 1" Square steel rod is cut from C-1055 high carbon material for longer wear and to prevent bending of rod.

Hydraulic Center Boot Drive Rod Weeder Attachments Include: Hydraulic motor and boot assembly, mount bracket for center boot assembly (6" or 12" offset), bearing hangers as noted and rods as required. Hoses are not included. Please specify and substitute rods for other than 40" rows.

Rod Weeders for Folding Tool Bars feature three independent drives to keep maintenance and repairs to a minimum. Three matched motors are plumbed in a series to utilize one remote hydraulic outlet. Rod support kit will attach to wings so there is no skip between rods or bearing hangers. Rod is staggered from center section (6" Offset) to wings (12" Offset). Optional drives may be substituted if desired.
